

REACH Declaration

REACH

European regulation on the **Registration, Evaluation, Authorization and Restriction of Chemicals**
VO (EG) 1907/2006

REACH distinguishes between materials, polymers, preparations and products in the relevant categories. As a general rule, usually only materials and preparations require registration; polymers and products do not.

Pfleiderer Deutschland GmbH is one of the leading manufacturers of wood products and surface technology. According to REACH, these are manufactured products and in line with article 7 are not subject to registration.

As a downstream user, we use materials for further processing in our products that are pre-registered or registered and approved. For our sake as well as that of our customers, we are in dialogue with our suppliers to ensure that all supplied products are REACH-conform.

Pfleiderer Deutschland GmbH complies with the duty to inform customers as per article 33, and confirms that at the current time and in accordance with the current state of knowledge, none of the materials in the "List of candidates" (article 59 (1)) are present in its products in a quantity greater than 0.1 percent by mass.

Dr. Axel Knörr
